Web Designing and Publishing Practical (PR2)
JAN 2025

1-Write a program to implement Lists in HTML.

2-Create a basic webpage showcasing "Responsive Web Design"

(a) Add a centered title called "Responsive Web Design" with font size 20.

(b) Include a paragraph describing what responsive design is and why it's essential.

3-Create a HTML page that will display following contents as it is on the web page-

Polynomial Expression
$6x^4+3x^3+3x^2+2x+1$

Normal Expression
a+b+c/d+e

```
<html>
<head><title>List in html</title></head>
<body>
<h1> List in html</h1>
<ol>
<li>school</li>
<li>college</li>
<li>university</li>
<li>coaching center</li>
</ol>
</body>

</html>
<!-- question no - 02  -->
<html>
<head> <title> Polynomial Expression</title></head>
<body><h1> Polynomial Expression</h1>
6x<sup>4</sup>+ 3x<sup>3</sup>+3x<sup>2</sup> +2x+1
 </body>
 </html>
 <!-- question no 03 -->
 <html>
 <head><title>Responsive web design</title></head>
 <body>
 <h1 style = "font-size: 20px; text-align:center;"> Responsive web design</h1>
<p> responsibe web design is essential for mobil and laptop
it is automatically adjust mobile and laptop </p>
 </body>
 </html>
```

out put
List in html
1.school
2.college
3.university
4.coaching center
Polynomial Expression
6x4+ 3x3+3x2 +2x+1
Responsive web design
responsibe web design is essential for mobil and laptop
it is automatically adjust mobile and laptop
